CBD OILS

our cbd oils are of premium quality made with swiss extract from organic swiss hemp plants. we also offer more affordable oils in the standard version. As carrier oil we offer various options such as hemp oil, mct (coconut oils), and olive oil. each oil is available in full-spectrum, broad-spectrum or with pure isolate. To grant product homogeneity and avoid crystallization of cannabinoids, we suggest a maximum of 30% cbd in mct oil and up to 25% with hemp oil as carrier

CBD TINCTURE

(10ml bottle)

Our CBD tincture is a liquid resulting from the mixing of the active principles of the CBD molecule together with ethanol. The alcohol acts as a preservative and thus helps extend the life of CBD in the formula.

Maintaining a stable daily dosage is simple, thanks to the dropper counter tip. Once diluted in a glass of water and digested, users can feel the effects of CBD and its benefits shortly after.

Each drop of the 10% tincture contains 2.5mg of CBD, while one drop of the 20% tincture contains 5mg of CBD. This innovative method of administration simplifies the calculation and assumption of daily CBD dosage.

Green Brothers offers a new way to consume and dose CBD intake, proof of know-how, continuous improvement, and increased product knowledge.

HEMP EXTRACTS

We recover almost all of each hemp plant that we harvest, in order to offer you different types of extracts rich in cannabinoids. Although these are mainly intended for the design of new products, they also find various uses with the final consumer, sometimes as a «booster».

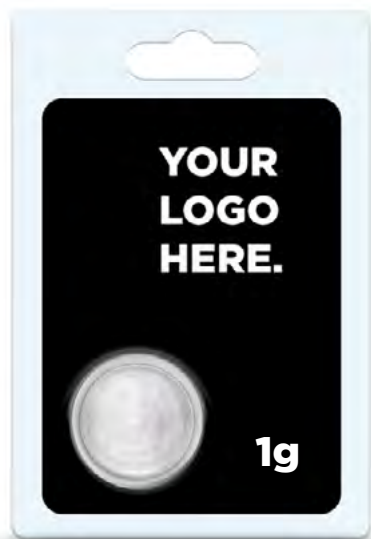

ISOLATE

Our Premium CBD Isolate is extracted from Swiss hemp flowers with a minimum purity of 99%. We offer a more affordable range of CBD isolate imported from the EU.

Create the product of your dreams with custom-made hemp extracts. Need a product with exactly 90% CBD, 4% CBN, and 2.5% CBG? No problem, contact your regular sales representative and get a quote.

CRUMBLE

Visually, crumble appears as crystals with a yellow to orange color. It offers a pleasant texture that is easy to crumble. Its benefits are felt more quickly than with flowers, depending on the consumption method used. They are also believed to be more effective.

DISTILLATE

The distillate is a hemp concentrate with a high cannabinoid content. The starting point for our distillates is the raw extract from the hemp plant, which undergoes processing and distillation during the manufacturing process. Waxes, lipids, and other plant substances are thus removed from the extract.

VAPPING

For several years now, the electronic cigarette has been making its way into smokers' pockets. Vaping has become commonplace, and is considered «healthier» than smoking cigarettes. CBD products for Vapers are multiplying, and choosing between manufacturers can be difficult.

Green Brothers offers e-liquids for common electronic cigarettes as well as «Vape-pens» with interchangeable cartridges. The e-liquids are of the «isolate» type and contain only CBD as cannabinoids. Vape-pen cartridges, on the other hand, are available in Broad Spectrum & Full Spectrum and therefore provide a greater effect thanks to the entourage effect from minor cannabinoids.

E-LIQUIDE 5% CBD

All our e-liquids have been developed by our team of cannabis experts to ensure convincing results in terms of flavors and a CBD concentration suitable for intense relaxation. We offer 2 types of e-liquid.

KLEANER THC

Our anti-THC spray is a vial with a spray nozzle containing a mouthwash. The liquid to be sprayed is made up of Neem oil, Agar gum, alcohol and a hint of orange food flavouring. When you consume THC, the body evacuates the molecule mainly through saliva. This product's concerted recipe breaks down the tetrahydrocannabinol in your mouth. So it's extremely effective and avoids unpleasant surprises... Distributed by Green Brothers Czech s.r.o.
